### **Tier**

3 - Type Approved, unit certification not required

### **Intended Service**

Marine & Offshore Application - for Mechanical Attachment Point with Adhesive.

### **Description**

CS125, CN125, CS200, CN200, CB3019, CB3200, CB9120, CB9151, CB9205, CB9522, CS922 & CS120 Fastener Bonded with CB200 or CB420 Adhesives.

Adhesive Bonded Studs, Standoffs, Cable Tie Mounts, Brackets, Loop Strap Fasteners & Pins used for Securing Panels, Electrical Cable Trays, Electrical Cable, Electrical Cable Boxes, Junction Boxes, Light Duty Fixtures, Light Hangers, Pipe and Tube Clamps and Furnishing Support Foundation supporting Filing Cabinets, Sleepings Berth, Tables, Chairs, etc.

### **Ratings**

See attached "pdf" for "Recommended Application, Design Service Loads and Restrictions"; "Material Data Sheet" and "Table 1 Fastener Usage."

### **Service Restrictions**

Unit Certification is not required for this product. If the manufacturer or purchaser request an ABS Certificate for compliance with a specification or standard, the specification or standard, including inspection standards and tolerances, must be clearly defined.

- i) Material to be stored, handled and used in accordance with manufacturer's recommendation.
- ii) Bonding process to be followed per manufacturer's installation instructions (CBPS-233 Process Specification).
- iii) Click Bond Fasteners manufactured from Non-Anodized Aluminum and Carbon Steel are not suitable

for installation.

iv) When used for cables not laid on top of horizontal cable trays or similar, suitable metal clips or straps are to be added at regular intervals not exceeding 2 m (6.5 ft) in order to prevent the release of cables during a fire. This requirement, however, need not apply to one or up to a few small diameter cables connecting to lights, alarm transducers, etc.

v) Plastic cable straps are not to be used for cable support on High Speed Craft but may be used with a combination of metallic cable straps for retaining cables.

### Comments

The Manufacturer has provided a declaration about the control of, or the lack of Asbestos in this product.

When used on ABS Classed Vessels:

i) Storage instructions and expiration dates are to be clearly marked on the package.

ii) Click Bond fasteners are not recommended for use in the following applications:

a) Locations where the service temperature exceeds that of the specified adhesive, or generally in environments where the continuous service temperatures are in excess of 250 °F (121 °C).

b) Applications on thin, unsupported substrate. For fastener with base diameters of greater than 1.25 inches, the substrate thickness must be greater than 0.125 inches (0.32 cm).

iii) Extent of use to be reviewed on a case by case basis.

### **Term of Validity**

This Product Design Assessment (PDA) Certificate 17-HS1597260-PDA, dated 05/Jan/2017 remains valid until 04/Jan/2022 or until the Rules or specifications used in the assessment are revised (whichever occurs first).

This PDA is intended for a product to be installed on an ABS classed vessel, MODU or facility which is in existence or under contract for construction on the date of the ABS Rules or specifications used to evaluate the Product.

Use of the Product on an ABS classed vessel, MODU or facility which is contracted after the validity date of the ABS Rules and specifications used to evaluate the Product, will require re-evaluation of the PDA.

Use of the Product for non ABS classed vessels, MODUs or facilities is to be to an agreement between the manufacturer and intended client.

ABS has used due diligence in the preparation of this certificate, and it represents the information on the product in the ABS Records as of the date and time the certificate is printed.

If the Rules and/or standards used in the PDA evaluation are revised or if there is a design modification (whichever occurs first), a PDA revalidation may be necessary.

The continued validity of the MA is dependent on completion of satisfactory audits as required by the ABS Rules. The validity of both PDA and MA entitles the product to receive a **Confirmation of Product Type Approval**.

Acceptance of product is limited to the "Intended Service" details prescribed in the certificate and as per applicable Rules and Standards.

This Certificate is valid for installation of the listed product on ABS units which exist or are under contract for construction on or prior to the effective date of the ABS Rules and standards applied at the time of PDA issuance. ABS makes no representations regarding Type Approval of the Product for use on vessels, MODUs or facilities built after the date of the ABS Rules used for this evaluation.

Type Approval requires Drawing Assessment, Prototype Testing and assessment of the manufacturer's quality assurance and quality control arrangements. The manufacturer is responsible to maintain compliance with all specifications applicable to the product design assessment. Unless specifically indicated in the description of the product, certification under type approval does not waive requirements for witnessed inspection or additional survey for product use on a vessel, MODU or facility intended to be ABS classed or that is presently in class with ABS.

Due to wide variety of specifications used in the products ABS has evaluated for Type Approval, it is part of our contract that; whether the standard is an ABS Rule or a non-ABS Rule, the Client has full responsibility for continued compliance with the standard.

Questions regarding the validity of ABS Rules or the need for supplemental testing or inspection of such products should, in all cases, be addressed to ABS.
